

At the scene: Asthma Management Skills Course

The Asthma Management Skills Course was conducted over two consecutive Sundays on 9 and 16 February 2003 at the COMB building. Similar to the Home Health Care Seminar, the Asthma Seminar was oversubscribed despite a larger class size of 100 participants. An equally successful rerun has also been held on 23 February and 2 March 2003.

A post event survey conducted by the College showed that the majority of the participants (98%) liked this new concept in CME. High approval ratings were given for content, speaker's presentation and the facilitators.

This event gave participants a maximum of 6 CME points if they attend all the seminars and teaching sessions. The Asthma Panel Discussion enabled participants to voice out questions regarding the subject matter of the course as well
